## EXPERIENCE

### **Sr. UX Designer — Lexmark**

Lexington.KY | 2022 to Present

Designed SaaS applications for data scientists and engineers working with IoT devices and data pipelines.

Worked with product owners to gather, manage, and prioritize a backlog of features and user stories using the Scaled Agile Framework.

Created processes to standardize project intake, scoping, and setup, thereby providing more efficient and consistent outcomes.

Delegated workload between multiple UX and visual designers across several work streams.

### **Sr. UX Consultant — Salesforce**

Chicago.IL | 2015 to 2022

Defined user needs through user research and delivered high-level designs, wireframes, and prototypes for enterprise customers as part of the professional services delivery group.

Analyzed and documented user journeys, pain points, and opportunities to improve business processes.

Wrote specifications for development and worked with developers to ensure designs were implemented correctly.

### **Sr. UX Researcher — ÄKTA**

Chicago.IL | 2011 to 2015

Led primary and secondary research for digital and mobile products, including contextual inquiries and prototype testing.

Synthesized findings into experience strategies and presented to clients for near and long term product development.

### **Video Editor — Mad Stache Productions**

Evansville.IN | 2002 to 2007

Edited video for 3 nationally-broadcast TV shows that reached 250,000 to 500,000 viewers weekly: *My Classic Car*; *Corbin's Ride On*; and *Texas Hardtails*.
